ATTITUDIAL SURVEY

Ask the question...

"What do you think our school is like at ..." to a range of people across the school.

	We do this well	We do it but it needs improving	We need to do this in the near future	This is not important for our school	Not sure
ENERGY					
Reducing energy use through good behaviours					
Investing in energy efficient appliances and equipment					
Teaching and learning about energy efficiency					
BIODIVERSITY					
Protecting local plants and animals within the school and local area					
Creating outdoor classrooms with native plants					
Providing habitats and food sources for birds and animals					
WATER					
Reducing water use through good behaviours					
Using water efficient equipment (e.g. dual flush toilets)					
Using efficient practices for watering grounds (e.g. mulching gardens)					
WASTE					
Reducing waste in all areas of school operations					
Recycling programs and procedures					
Composting or mulching garden waste or food scraps					
TRANSPORT					
Encouraging staff and students to walk, ride bikes or use public transport					
Providing secure bike parking and safe places to cross roads					
AIR					
Minimising pollution emissions					
Keeping noise to reasonable levels					
SCHOOL CULTURE					
Involving everyone in environmental management
